Sudeshna Sadhu, a second year graduate student in the Department of Molecular and Cellular Physiology, recently won a travel award to attend the American Heart Association Vascular Discovery: From Genes to Medicine in San Francisco, CA, May 10-12, 2018.

### **Department of Molecular and Cellular Physiology (MCP)**

Cellular and molecular Physiology introduces and goes beyond the medical aspects of classical Physiology. Physiology is the science of functioning. Cellular and molecular Physiology compares organs, cells, and molecules under living conditions in nature with those in engineering facilities. To this end, the morphology

of cell biology as it pertains to mammalian physiology. Specific emphasis is placed on the molecular mechanisms of gene expression and genome function including the role of chromatin and non-coding RNA, translation, cell cycle and division, protein trafficking, cellular metabolism and cell signaling. Other topics include the

### **COURSE INFORMATION: Molecular and Cellular Physiology**

The updated 2nd edition of this accessible and in- depth resource firmly relates molecular and cellular biology to the study of human physiology and disease. Leading physiologists present you with practical, accurate coverage, continually emphasizing the clinical implications of the material.

### **Medical Physiology : A Cellular and Molecular approach**

Molecular and Cellular Physiology of Neurons is an idiosyncratic book that does relieve some of the itch. It is a book about nerve cells and molecules, pure and simple. It is selective in what it offers but presents ideas in a succinct way that should be accessible to any graduate neuroscientist.

### **Lecture 4 - Molecular and Cellular Physiology (10) - Class**

The Department of Molecular and Cellular Physiology explores how cells communicate, interact and enable complex physiological function. Our labs take an interdisciplinary approach, with an emphasis on quantitative and structural approaches drawn from multiple scientific disciplines, including structural biology, biophysics, cell biology, immunology and neuroscience.
