Biotechnology is the broad area of biology involving living systems and organisms to develop or make products, or "any technological application that uses biological systems, living organisms, or derivatives thereof, to make or modify products or processes for specific use" (UN Convention on Biological Diversity, Art. 2). Depending on the tools and applications, it often overlaps with the ...

### **Biotechnology - Wikipedia**

The life sciences or biological sciences comprise the branches of science that involve the scientific study of life and organisms – such as microorganisms, plants, and animals including human beings.. Life science is one of the two major branches of natural science, the other being physical science, which is concerned with non-living matter.. By definition, biology is the natural science ...
