NIST Special Publication 800-53 provides a catalog of security controls for all U.S. federal information systems except those related to national security. It is published by the National Institute of Standards and Technology, which is a non-regulatory agency of the United States Department of Commerce. NIST develops and issues standards, guidelines, and other publications to assist federal ...

Cybersecurity's current moment in the spotlight, propelled by numerous high profile data breaches and cyberattacks in recent years (Wannacry, Target, Deloitte, etc), has most industry professionals nervously seeking guidance for their organizations in 2018. If your line of work involves information technology, one of the frameworks you've likely heard of in the last few years is NIST.

Dual\_EC\_DRBG (Dual Elliptic Curve Deterministic Random Bit Generator) is an algorithm that was presented as a cryptographically secure pseudorandom number generator (CSPRNG) using methods in elliptic curve cryptography. Despite wide public criticism, including a potential backdoor, for seven years it was one of the four (now three) CSPRNGs standardized in NIST SP 800-90A as originally published ...
