The autonomic nervous system plays a crucial role in the cardiovascular response to acute (dynamic) exercise in animals and humans. During exercise, oxygen uptake is a function of the triple-product of heart rate and stroke volume (i.e., cardiac output) and arterial-mixed venous oxygen difference (the Fick principle).

This chapter investigates the right to survival of a child, focusing on health, nutrition and shelter. The provision of health care services is the responsibility of the State governments. Abortion led by sex determination is totally illegal and a criminal act on the part of the doctor. The parliament of India recently approved the amendments to the Medical Termination of Pregnancy Act 1971 ...

Homeostasis is the state of steady internal conditions maintained by living things. This dynamic state of equilibrium is the condition of optimal functioning for the organism and includes many variables, such as body temperature and fluid balance, being kept within certain pre-set limits (homeostatic range). Other variables include the pH of extracellular fluid, the concentrations of sodium ...

### **Time for Food: The Intimate Interplay between Nutrition**

The nervous system is the part of an animal that coordinates its actions by transmitting signals to and from different parts of its body. The nervous system detects environmental changes that impact the body, then works in tandem with the endocrine system to respond to such events. Nervous tissue first arose in wormlike organisms about 550 to 600 million years ago.
